**Art. 30(3) din Regulamentul privind activitatea profesională a studenților:**  
**Ierarhia anuală se întocmește în baza mediei ponderate obținută de studenții integraliști în anul ce se încheie, indiferent în care din sesiuni a promovat disciplinele, urmată de ierarhia studenților neintegraliști, în cazul în care rămân locuri bugetate disponibile. Ierarhizarea studenților neintegraliști se va face în funcție de punctaj (P) după formula:**

$$P = \frac{n}{\sum_{i=1} K_i D_i}$$

unde:

- n= numărul de discipline promovate, participante la medie
- K<sub>i</sub>= numărul de credite aferent disciplinei i
- D<sub>i</sub>= nota la disciplina promovată i

**La medii ponderate sau punctaje egale, departajarea se va face în funcție de media de admitere (criteriul 1) și de media ponderată/punctaj a anului precedent (criteriul 2).**

Art. 30(3) din Regulamentul privind activitatea profesională a studenților: Ierarhia anuală se întocmește în baza mediei ponderate obținută de studenții integraliști în anul ce se încheie, indiferent în care din sesiuni a promovat disciplinele, urmată de ierarhia studenților neintegraliști, în cazul în care rămân locuri bugetate disponibile. Ierarhizarea studenților neintegraliști se va face în funcție de punctaj (P) după formula:

$$P = \frac{\sum_{i=1}^n K_i D_i}{n}$$

unde: • n= numărul de discipline promovate, participante la medie

- $K_i$ = numărul de credite aferent disciplinei i
- $D_i$ = nota la disciplina promovată i

La medii ponderate sau punctaje egale, departajarea se va face în funcție de media de admitere (criteriul 1) și de media ponderată/punctajul anului precedent (criteriul 2)

**Art. 30(3) din Regulamentul privind activitatea profesională a studenților: Ierarhia anuală se întocmește în baza mediei ponderate obținută de studenții integraliști în anul ce se încheie, indiferent în care din sesiuni a promovat disciplinele, urmată de ierarhia studenților neintegraliști, în cazul în care rămân locuri bugetate disponibile. Ierarhizarea studenților neintegraliști se va face în funcție de punctaj (P) după formula:**

$$P = \frac{\sum_{i=1}^n K_i D_i}{n}$$

**unde:**

- **n= numărul de discipline promovate, participante la medie**
- **K<sub>i</sub>= numărul de credite aferent disciplinei i**
- **D<sub>i</sub>= nota la disciplina promovată i**

**La medii ponderate sau punctaje egale, departajarea se va face în funcție de media de admitere (criteriul 1) și de media ponderată/punctaj a anului precedent (criteriul 2).**
